R&D

# Raw Materials to Manufacturing

We provide tailored development and manufacturing services for our clients' products using cutting-edge research and production technology in clean, derma, natural, and organic cosmetics.

## All the Way to Certification We provide Tailor fitted Full Service to you

### Ingredient Development

Exploration of Domestic & International Raw Materials, Alongside Independent Development of Novel Ingredients

### Certification

Certified Cosmetics (Vegan, Natural, and Organic), International Export Certifications (CPNP, NMPA and more)

### R&D

R&D in Clean Beauty, Dermatology, Hair Loss Solutions, Natural Cosmetics, Sunscreens, and More

### Production

Expertise in Manufacturing Dermatological, Functional, and Organic Cosmetics

R&D

# Production Range

We specialize in foundational skincare and manufacture products ranging from hair and body care to hygiene solutions.

## SKIN CARE

- Basic Skincare Products such as Toners, Essences, and Ampoules
- Sunscreen Products & Cleansers

## MOM & BABY

- Toner, Lotion, Cream + Basic Care
- Wash, Shampoo and Cleansers
- Multi Stick balm, Sunscreen

## DERMA CARE

- SKIN CARE : Multi functional, Anti-aging, Whitening, Trouble care, Acne Care
- Hair : Anti-Hair Loss

## HAIR & BODY

- Shampoo & Conditioner
- Body Wash and Lotion
- Perfume

## FEMININE TECH

- Gel/Foam Cleanser
- Moisturizing Gel
- Men's Hygiene Cleanser

## ORGANIC / NATURAL / VEGAN

- Natural : COSMOS, BDIH
- Organic : USDA, COSMOS, BHID
- Vegan : Vegan Society, Eve Vegan

- Italy V-Label Vegan

## Cruelty-free

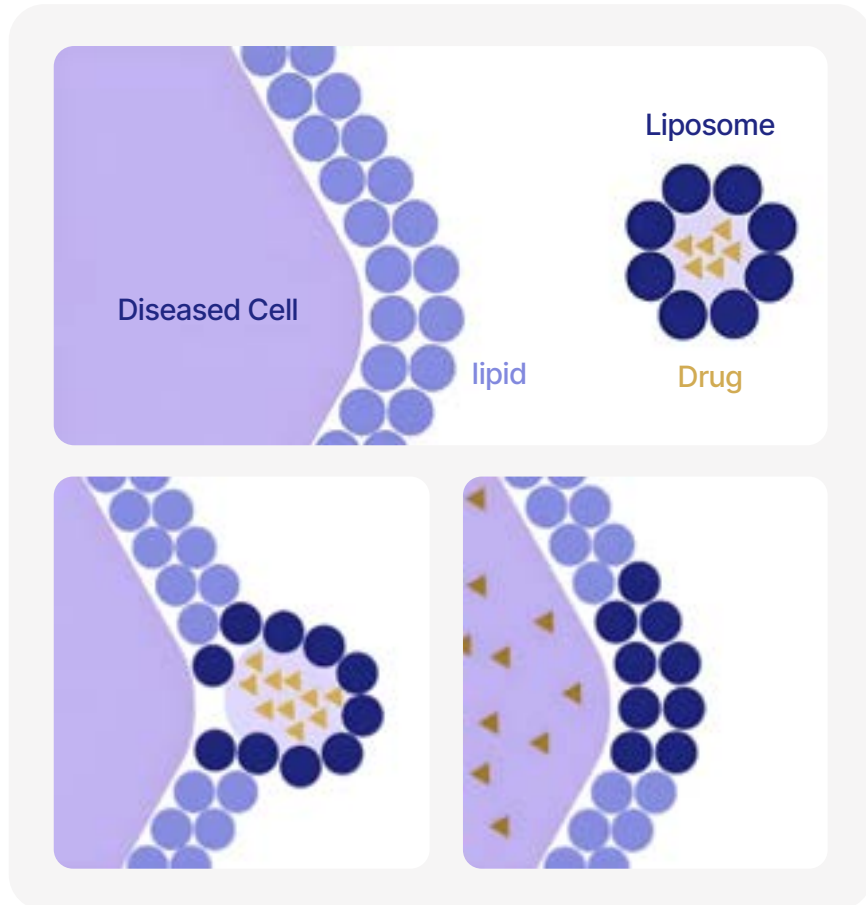

- Germany Derma
- Leaping Bunny
- Cruelty-free

We have passed several qualifications and tests to create healthy and nature-friendly products.

# Exclusive Derma Technology

## 1. Organic Liposome Formulations

### Natural Moisture Complex Liposome

Ecoment's unique ingredients, developed solely from natural and organic sources, leverage a technology that encapsulates active ingredients within membranes (capsules).

This approach facilitates the delivery of active components to the skin, especially when they have larger particle sizes or are lipophilic, making it difficult for them to penetrate the skin's lipid structure.

### Expected Benefits

- Enables easy and rapid skin penetration, facilitating the delivery of active ingredients to the skin.
- Allows for deep penetration of biologically active components into the skin.
- Enhances moisturizing and moisture retention capabilities.
- Non-toxic and biodegradable.
- Enables simultaneous delivery of both water-soluble and lipid-soluble substances.

# Exclusive Derma Technology

## 2. Development of Multi-Functional Liposomal Formulation for Lipid-Soluble Vitamins

### Vitamin A

Anti-aging and  
acne improvement

### Vitamin E

Protect skin from  
external stimuli

### Vitamin K

Helps red and  
damaged skin recover

### Vitamin F

Strengthening the  
barrier structure

### Multi-Functional Liposomal Formulation for Lipid-Soluble Vitamins

Liposome Vitamin  
Injection

Pure Vitamin  
Infusion

Pure Vitamin + Vitamin  
Derivative Infusion

## Ascorbic Acid, Tocopherol, Menadione, Linoleic Acid, and Retinyl Palmitate Encapsulated in a Solid-State Cosmetic Composition

This composition contains sensitive water-soluble and lipid-soluble vitamins such as Ascorbic Acid, Tocopherol, Menadione, Linoleic Acid, and Retinyl Palmitate, encapsulated using a proprietary liposomal method to prevent degradation from heat, light, air, and other oxidative factors. Ultimately, Eco-Mint has successfully developed a stock formulation and ampoule containing 30% Vitamin C using this technology.

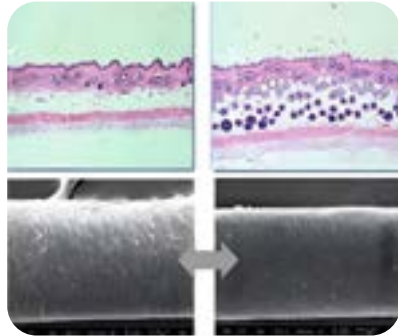

## Expected Benefits

- Enhanced stability of sensitive vitamins against external factors like heat, light, and air through proprietary liposomal encapsulation.
- Maintains the stability of active ingredients to prevent degradation.
- Protects the skin from harmful reactive oxygen species and maintains a stable state.
- Applicable to various formulations including toners, etc., due to high vitamin content.
- Ensures effective delivery of vitamin active ingredients deep into the skin.

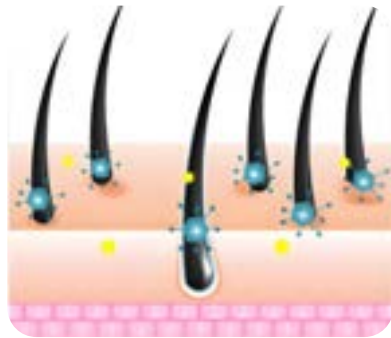

# Exclusive Derma Technology

## 3. Shampoo for Hair Loss Prevention and Improvement Using Fermented Extract of Mugwort (\*Patent Pending)

The Effects of  
Natural Material  
Fermentation  
on Hair

The Impact of  
Liposomes on  
Hair Loss

## Developing a Cosmetic Ingredient for Hair Loss Prevention, Improvement, or Protection Containing Hyperoside from Mugwort Extract

Utilizing Bioconversion Technology with Probiotic Fermentation to Increase Proliferation of Hair Follicle Cells by Decreasing DKK-1 and Increasing VEGF and LGF 1, thus Improving Hair Loss.

Most domestic products are limited to herbal medicine ingredients, and it was developed to improve the lack of diversity in hair loss formulations by containing functional hair loss ingredients such as zinc pyrithione, dexpanthenol, biotin, and L-menthol.

## Expected Benefits

- Minimizes scalp irritation and inhibits hair damage and loss with our proprietary organic liposomal ingredient.
- High stability of hair loss formulations using natural plant-based ingredients, providing a wide range of stable formulations without traditional herbal ingredients.

# Exclusive Derma Technology

## 4. Organic Sun Care Cushion, Cream, and Milk

### Certification Requirements for Organic Sunscreens

95% or more using natural ingredients

20% or more contains organic ingredients

Annual inspection of certification system

Comfortably soothes without irritation, redness

Keeps pores clear and leaves a matte finish

Free from synthetic fragrances

## Development of Organic Mineral Sunscreen

This mineral sunscreen, certified by COSMOS, is formulated with sunscreen ingredients suitable for sensitive skin, infants, children, and pregnant women. It provides effective protection without leaving a white cast, with a moist and soft texture. Sun cushions, essences, and creams using this technology have been successfully developed.

## Expected Benefits

- Products eligible for COSMOS organic certification are safe for sensitive skin, providing peace of mind for users.
- Mineral sunscreen ingredients wrap around the skin surface, reflecting or dispersing UV rays to protect the skin.
- Supplies nutrition to damaged skin from external irritants, promoting elasticity and radiant skin

# PRODUCTS

Products with nature

# Clean Derma : Skincare

## Retinal Night Cream

- Realization of a Transparent Formulation for Retinol Products
- Stabilizing Retinol, a Challenging Ingredient to Stabilize Using Liposome Technology, While Enhancing Skin Absorption

### Suggested Ingredients

Retinol, Retinyl, PDRN, along with 12 types of Vitamins and Ceramides

## Marshmallow Cream

- A new cream formulation that stretches and thickly coats
- Green formulations designed for dry, sensitive skin allow for diverse color expressions such as green and pink

### Suggested Ingredients

Phyto-Mucin, Peptides, Vegan Collagen, Bakuchiol, Bifida Fermented Filtrate

## Vitamin C 30 Stick Balm

- Stabilizing easily-degraded pure Vitamin C with a dual coating system to ensure stability, allowing for a high concentration of 30%
- 3-in-1 Care : High-concentration Vitamin C for abundant moisture supply, skin brightening, and skin texture improvement

### Suggested Ingredients

Vitamin C, Vitamins A, E, F, K, Idebenone, Cactus Oil

## CICA Ointment Cream

- A semi-solid formulation with a transparent and moderate viscosity, between ointment and cream
- Expect fast soothing effects with a patented formulation tailored for troubled skin

### Suggested Ingredients

Mugwort, Centella Asiatica, Panthenol, Coenzyme Q10

# Clean Derma : Skincare

## Melanin Break Ampoule

- Powerful Antioxidant Effect with Complex Vitamins (Vitamin B5, C, E, A, Glutathione, etc.)
- Enhancing stability and skin absorption rate through hydroethosome technology

### Suggested Ingredients

Vitamin B& , Glutathione, Vitamin Fruit Tree Oil, Bakuchiol, Idebenone

## Sparkling Vita C Essence

- Protecting the efficacy of Vitamin C with Effervescent tablet technology
- The carbonated water bubbles aid skin absorption, promoting whitening effects and improving skin texture

### Suggested Ingredients

Complex Vitamin, EGF, Whitening Peptides, Mandarin Extract, Bergamot Oil

## Triple-Layer Boosting Ampoule

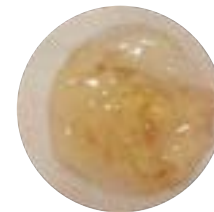

- Triple-Layered Ampoule, Essence, and Oil Formulation for Shaking before Use
- Incorporating plant oils into beads for smooth rolling and enhanced skin absorption

### Suggested Ingredients

Alpha Bisabolol, Jeju Camellia Extract, Vegan Squalane, Rosehip Oil, Syn-Ake

## Flower Petal Mask

- Organic Calendula Flower Petals infused in a gel-type mask for soothing irritation and providing moisture hydration
- Real herbs such as Rose, Calendula, Green Tea, etc., added for versatile functionalities

### Suggested Ingredients

Bifida Ferment Filtrate, BHA, PHA, Rose Leaf, Calendula Leaf, Green Tea LeafOil

# Clean Derma : Hair / Body / Perfume

## Professional Haircare Line

- Shampoo, conditioner, and oils tailored for hair salon experts
- Specialized in a recovery line for damaged hair

### Suggested Ingredients

Hydrolyzed Soy Protein, Biotin, Elastin

## Body Wash, Lotion, Scrub

- Gentle cleansing wash and scrub for oneself and the environment with eco-friendly ingredients
- Formulations that help solve body skin concerns such as anti-aging, whitening, acne

### Suggested Ingredients

Lavender Ceramide, Tamanu, Dipanthenol, Castanea crenata inner shell extract

## Hair Loss Care

- Tested and proven hair loss prevention tonic, enriched with a combination of herbs and traditional Korean medicine ingredients
- Helps regulate scalp temperature to address causes of hair loss such as excess sebum production and enlarged pores

### Suggested Ingredients

Copper Peptide, Caffeine, Artemisia Capillaris Extract

## Solid Perfume

- Various types of solid perfumes with scents that melt softly into body temperature and last for a long time
- Convenient and safe to use with stable texture and fragrance

### Suggested Ingredients

Mugwort, Centella Asiatica, Panthenol, Coenzyme Q10

# Clean Derma : Foam Cleansing

## Oil to Foam Cleanser

- A makeup remover that turns into foam with water after applying oil
- Contains probiotic ferment for a stronger skin microbiome and enhanced immunity

### Suggested Ingredients

LHA, Lactobacillus Ferment, Propolis, White Tea Extract, Centella Asiatica Extract, Hemp Seed Oil

## Pink Calamine Cleanser

- Pink Calamine Cleanser effectively cleanses away excess sebum and blackheads while targeting the root causes of skin troubles

### Suggested Ingredients

AHA, BHA, LHA, PHA, Galactomyces ferment filtrate, tamanu oil, rose oil, and tea tree extract

## Gel to Foam Cleanser

- When in contact with body heat and water, the gel transforms into an oil foam, rolling smoothly and silkily without any irritation.
- Leaves skin moisturized and radiant after cleansing

### Suggested Ingredients

Okra water, jobstear water, vitamin C, greentea water, rice bran extract, centella asiatica extract, quince leaf extract

## Whipped Soap

- A cleansing function that is as soft as whipped cream and allows for simultaneous second cleansing
- Natural ingredients allowing for diverse functions and color expressions

### Suggested Ingredients

Fermented rice wine extract, green tea water, green-pink-red clay, cocoa powder, chlorella powder

# Clean Derma : Makeup Cleanser

## Cleansing Balm in Tube

- Tube-squeezable balm type
- Lighter and fresher than hard balm
- Clean and hygienic tube type

### Suggested Ingredients

Bakuchiol, Grapefruit Oil, Orange Oil, Lemon Oil, Tea Tree Oil, Rosemary Oil

## Cleansing Milk

- Moisturizing, low-irritation milk-type cleanser
- Provides moisturizing and soothing effects without tightness after cleansing

### Suggested Ingredients

Soybean Protein, Rice Extract, Oat Extract, Chamomile Water, Galactomyces Ferment Filtrate

## Bye Bye Blackhead Clanser

- Cleanses makeup while removing blackheads and dead skin cells
- Gently rub and wash off to remove impurities from pores, leaving a moisturizing sensation

### Suggested Ingredients

AHA, BHA, PHA, Papaya Extract, Witch Hazel Extract, Rice Extract, Red Wine Water, Yuja Water

## Cleansing Water

- Removes residue from the skin and balances the moisture level for sensitive skin
- Suitable for sunscreen removal from infants to children, providing a clean and mild cleansing experience

### Suggested Ingredients

Okra Water, Lemon Balm Water, Yuja Water, Calendula Water, Alaska Glacial Water

# Clean Derma : Female Tech Product

## Cleanser for Men & Women

- Formulated with safe green ingredients and slightly acidic pH for worry-free use on sensitive areas
- Gentle foam aids in thorough cleansing without irritation and maintains moisture

### Suggested Ingredients

Lactobacillus, Panthenol, Geranium, Rosewater, Mugwort Extract, Angelica Extract, Allantoin

## Hygiene Wellness Spray/Mist

- Conveniently used by spraying without rinsing, helps with odor and skin dryness
- Maintains Y-zone health by aiding beneficial bacteria and inhibiting harmful bacteria

### Suggested Ingredients

Bifida Ferment Lysate, Lactococcus Ferment Lysate, Hot Spring Water, Vegan Collagen, Beta-Glucan, Lavender

## Moisture Gel

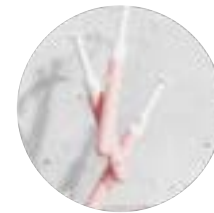

- Provides abundant moisture to dry and sensitive skin to reduce irritation
- Low-irritation moisturizing gel with long-lasting effect

### Suggested Ingredients

Hyaluronic Acid, Squalane, Adenosine, Ceramide, Madecassoside, Ylang Ylang Oil, Centella Extract, Okra Water

## Inner Intimate Gel

- Hygienic with one-touch disposable container
- Excellent in improving dryness, strengthening the skin barrier and safe for skin with natural-derived ingredients and gentle gel formula, without irritation

### Suggested Ingredients

Yeast Ferment Extract, Aloe Vera Extract, Peptides, Licorice Extract, Pomegranate Extract, Houttuynia Cordata Extract

# Organic : Skincare

## Cream & Lotion

Utilizing liposome technology to enhance moisturizing and absorption abilities while increasing the penetration of active ingredients into the skin

#Panthenol Barrier Cream  
#Squalane Soothing Lotion #Rich Soothing Cream

## Toner & Mist

Utilizing a variety of plant-based complex extracts to replenish moisture and enhance functional effects

#Double Layer Toner  
#Calendula Petal Toner #Foam Toner

## Ampoule & Essence

Utilizing organic-certifiable whitening and wrinkle-improving ingredients to enhance the effects of anti-aging and whitening management

#Centella Soothing Ampoule #Flower Petal Oil Essence  
#Wrinkle-Functional Ampoule

## Balm & Ointment

Lip balm and moisturizing balm containing highly nutritious organic plant oils protect moisture without irritation

#Hemp Moisture Balm  
#Cactus Lip Balm

# Organic : Mom&Baby / Body&Hair / Cleanser

## Top to Toe Wash + Shampoo

A mild wash that can cleanse from head to toe and an organic shampoo that is gentle on the hair without irritation

#Buttocks Cleanser #Mild Top-to-Toe Wash  
#Non-irritating Shampoo

## Oil to Foam Cleanser

An all-in-one cleanser that includes water-type and bubble-type cleansers, and when water is added, transforms from oil to foam

#Bubble Cleanser #Water Cleanser  
#Oil-to-Foam Cleanser

## Baby Lotion, Cream, Mist, Gel

Moisturizing products with low irritation and high moisturizing properties, considering the sensitive skin condition of babies

#Dermatologically Certified Organic Cream

# Our Area of Expertise

## Accumulated Expertise in Dermatological and High-Performance Cosmetics

Possessing proprietary ingredients and formulation technology in areas such as hair loss, whitening, wrinkles, and acne.

## Diverse Organic Formulations with Patented Technology

Accumulating a portfolio of natural and organic ingredients along with formulation technology.

## Swift and Accurate Document Handling

Supporting global success with quick export documentation and suitable formulation development for export country approvals.

## Certification Consulting and Support

Consulting and support for obtaining domestic and international cosmetics certifications such as Vegan, Natural Organic, Cruelty-Free, German Dermatetest, and EWG.

## Domestic/International Organic Ingredient Planning and Sourcing

Discovering domestic and international farms for raw material cultivation. Sourcing raw materials directly from global origins. Supplying competitively priced products.
